Data Source: Maine Integrated Youth Health Survey.

Based on parents who said their child lived with at least one person who smoked cigarettes, cigars, or pipes inside the house.

All percentages are weighted to be more representative of the population of Maine students and to adjust for non-response.

95% CI = 95% Confidence Interval.

NA = not available

\*\* All racial categories are non-Hispanic except for "Hispanic."

^ Results are not reported because weighted data are not available due to low response rates.
